Access Guide to Melbourne's Eateries

The vision of the City of Melbourne's *Disability Action Plan* is to ensure that Melbourne addresses and promotes the rights of people with disabilities to equitable, dignified and independent access and participation opportunities.

City Eating – An Access Guide was first developed and published in 2005. This second edition has been updated in response to the overwhelmingly positive feedback from members of the community, disability agencies, the entertainment and tourism sectors.

People with disabilities provided input into what they consider to be the most relevant and useful information when determining a suitable place to eat. This 2006 edition has been expanded to include 100 eateries across the municipality, and has been refined to include new categories of access information. Each eatery is described according to these considerations,

including access to the main entry, lighting, noise, toilets and parking.

Fun times shared with family, friends, and colleagues are enhanced over a delicious meal – be it a bowl of pasta, a tray of sushi, a souvlaki or traditional fish and chips. This guide provides an array of eating options with information about access to help people of all abilities to choose a location that best suits their needs.

Bon appétit!

Issues considered

To assist people in making a decision about an eatery's accessibility the following issues have been considered in compiling this guide:

- Name of eatery
- Cuisine type
- Address
- Telephone number
- Email address
- Availability of SMS number
- Website address
- Hours of operation
- Price range
- Seating
- Liquor licence

- Type of dining area/s
- Access to main entry
- Floor surfaces
- Furniture that can be moved easily
- Access to ordering areas and processes
- Customer service to tables
- Availability of a wheelchair or scooter battery recharge point
- Provision of designated accessible toilet
- Lighting
- Noise
- Parking

Important information before using this guide

Australian Standards for Access and Mobility (AS 1428)

AS 1428 prescribes the basic requirements for physical access which should be considered in the planning, development and construction of buildings and facilities, including eateries. For a variety of reasons, not all premises currently comply with these standards. Listing of an eatery and its facilities in this guide does not imply that it currently meets the requirements for access, as required under AS 1428. Rather, this guide is intended to provide potential customers with information that can assist them to choose a venue that fits their individual requirements.

Toilets

Identification of the provision of a designated accessible toilet does not necessarily mean that the toilet complies with current AS 1428 requirements. It indicates that there is a toilet on the premises that displays the international symbol of access and the cubicle may be of a larger size than a standard toilet cubicle. Appropriate fixtures and fittings

may not be installed to ensure full access. Potential patrons should check with the eatery management to ascertain further details if required.

Car Parking

Unless specified, public on-street parking or off site car parking only is available. Where possible information has been provided regarding proximity of designated accessible parking to each eatery listed in the guide.

Changes of level

Lifts or ramps are noted, if installed, otherwise stair only access is provided.

Weather Protection

Unless specified, weather protection in outdoor areas is provided by an awning generally attached to the building and providing a roof over the eating area.

Lighting

The description of lighting in the premises has been provided by the proprietor and relates to tables in indoor areas only, unless outdoor lighting is specified.

Access to outdoor dining areas

Unless specified, access to outdoor dining area is via relatively level access on a footpath.

Scooter or Wheelchair Recharge Point

The availability of a power point in or close to the eating area within the premises, for use by a person to recharge a wheelchair or scooter has been included. Patrons would need to provide any other equipment, (e.g. transformer, etc.) that they may require to recharge their particular mobility aid.

Further information regarding many of the restaurants listed in this guide can be obtained from www.thatsmelbourne.com.au.
