Elevation (Front)

City swivel seats are to be used in pedestrian areas within the Central City and Docklands.

Swivel seats are to be located in wide promenades and plazas. They are not suitable for use in narrow footpaths.

Swivel seats are to be installed in groups and located carefully to ensure views and pedestrian circulation are unimpeded.

The seats are to be fabricated from grade 316 stainless steel with a satin polish.

For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 902082 Stainless steel swivel seat
