### **3. Confirmation of minutes of the previous meeting**

Moved:            Cr Griffiths

*That the minutes of meeting No 41, held on Tuesday 16 August 2022, be confirmed.*

Seconded:       Cr Hakim

The motion was put and carried unanimously with the following Councillors present: The Chair, Lord Mayor Sally Capp, and Councillors Dr Ball, Campbell, Chang, Doidge, Griffiths, Hakim, Leppert and Louey.

### **4. Matters arising from the minutes of the previous meetings**

There were no matters arising from the minutes of the previous meeting.

### **5. Public questions**

Three written public questions were received, one of which was also asked verbally.

#### **Lighting and Safety around Haymarket/Elizabeth Street**

Abi Van Der Zwan submitted the following written question:

*My name is Abi Van Der Zwan and I am the elected Women's Officer at Melbourne University's Graduate Student Association (GSA). GSA represents 37,000 graduate students. Recently, we were approached by the Peter Mac Research Students Society who cited unsafe behaviours at the Haymarket/Elizabeth St Tram Stop and students feel unsafe in the area. From Elizabeth St from the Hospital Precinct down towards the intersection with Queensberry St, and also Pelham St from the Haymarket Tram Stop to the intersection with Barry St.*

*There have been multiple assaults in the area and students have raised with me a request for additional lighting and safety precautions.*

*Are there any plans to increase lighting, CCTV or security infrastructure in the area?*

Lord Mayor Sally Capp, City Transport, Operations and Infrastructure Portfolio Lead read out the following response provided by Craig Stevens, Director City Infrastructure:

*We are sorry to hear that there have been assaults happening in the area around Haymarket roundabout. All assaults should be reported to 000 at the time or to the Police Assistance Line on 131444 or online at Police.vic.gov.au. We have raised this area with Victoria Police to ensure they are aware of the safety issues.*

## Confirmed minutes

*At this stage there are no plans to upgrade the street lighting in this area. We do note however that the majority of the streetlights in this area are located on the median strips of Elizabeth St and Pelham St, which may result in some darker areas on the footpath in certain places. We will undertake a lux level survey during the night time to ascertain the adequacy of existing lighting. Any areas that are below normal lighting standards will be included in our future programmed upgrade works.*

*Our Safe City CCTV camera network operates primarily in the CBD area. At this stage there are no plans to expand the network.*

### **E-Scooter Safety**

Natalie Wallis submitted the following written question:

*As I notified the council last week, my son was uninjured but was hit by an e-scooter on the footpath of the corner of Collins and Elizabeth Street. We see people riding on these paths daily despite (according to the police that I spoke with) it not being a permitted space. Given that an 11-year-old boy was injured in February, current steps have not worked. As I mentioned in my letter, I feel the council must take some responsibility for allowing the actual program to go ahead.*

*What steps has the Melbourne City Council taken or is going to take to help our youngest visitors and residents both be and feel safe and secure in the city? When I was young I participated in neighbourhood watch and bike-ed that helped me understand how to navigate the roads and safety. At the very least we need clear signage and a proper education program directed at children and families. What actions are the council taking to ensure the safety of its youngest residents and visitors?*

Lord Mayor Sally Capp, City Transport, Operations and Infrastructure Portfolio Lead read out the following response provided by Sophie Handley, Director City Strategy:

*We are glad to hear that your son was uninjured in this incident, and I understand that our staff have written to you about this matter.*

*Council has joined the Cities of Port Phillip, Yarra and now Ballarat in the Victorian Government's E-Scooter Trial which is supported by our Transport Strategy. Your account of the incident and all other feedback will form part of the evaluation of the trial. Compliance with the trial rules is being monitored and riders behaving inappropriately are restricted from accessing the scooters. Later this month Victoria Police and the scooter operators are running an education program to promote safe and legal riding. More generally, Council has clear targets to reduce road trauma through reduced speed limits, new pedestrian crossings, wider footpaths, separated bike lanes all of which assist children and all citizens to move around the city safely.*

Cr Le Liu arrived at the meeting at 5.40pm.

### **Safe injecting room**

Susanna Louie submitted a written question and asked the following verbally:

*Wayne Gatt from the Police Association warns that the persistent problems that have plagued the Richmond safe injecting room shouldn't be ignored and should certainly not be replicated.'*

*He says that 'You only have to speak to the residents of North Richmond and the Yarra police, to hear about the damage to the amenity of the area as well as the altered perception of safety and the impact of crime on the surrounding streets, to know that creating a similar facility in the CBD will create more problems for the community than solutions for the users.' More harm than good.*

*This is a scathing review of the North Richmond facility by the police and is in direct conflict with the Councillors in this room's assessment that the program is a resounding success.*

*So much evidence has come to light since this council voted in support of a second SIR in the CBD. In addition to strong opposition from the Police Association, we learn that funding for drug and alcohol addiction treatment has been cut by \$25 million when more funding is actually needed. We also see that although heroin deaths may have dropped moderately, it can be attributed to heroin being in shorter supply, as evidenced by regional heroin deaths decreasing at a greater rate during the same period of time. Meth related deaths however have skyrocketed from 34 deaths in 2012 to 137 last year. That is horrifying. It was also disclosed that there were 90 thousand needles strewn across public areas in North*

## Confirmed minutes

*Richmond last year, this is something that many of you ardently denied, as you claimed there was no impact to amenity in the area. All of this points to a program that has failed the core group that it was trying to help while annihilating the community surrounding it. Wayne Gatt knows this, Yarra police know this and the residents of North Richmond definitely know it. The existing SIR is doing more harm than good.*

*With so much of this Council's evidence supporting the SIR now negated directly by the Police as well as the evidence presented here tonight, can this Council tell us if they plan on heeding the Association's advice and reconsider the installation of the second SIR in the CBD?*

*Can Councillors also please tell us by what criteria they consider the current SIR to be a success, and what would it take beyond the independent reports I have just mentioned to admit that there are problems? Because, if you can't admit to the problems, you can't learn from them. And finally, what criteria will be set to measure the success or failure of any such facility put into the CBD? How will you ensure transparency for the people of Melbourne?*

Cr Dr Ball, Health and Wellbeing Portfolio Lead provided the following response prepared with support from Linda Weatherson, General Manager Community and City Services.

*We share many of your concerns and we are not suggesting there are no needles discarded in the public space in North Richmond. We can agree on the need for greater treatment of alcohol and other drug dependency and your concern about overdose deaths in our city.*

*The proposal for a second safe injecting service to be located within the City of Melbourne is that of Victorian Government. The decision to proceed and the location of the service is therefore also that of the Victorian Government.*

*An amended Notice of Motion in regards to an injecting room in the City of Melbourne was put and passed by a majority of Councillors at the Future Melbourne Committee meeting on 16 August. The resolution included that:*

- 1. Council continued support for a medically supervised injecting service (MSIS) in the City of Melbourne, conditional on it being located within a comprehensive health service noting that the model proposed for the CBD, is to be significantly different from the stand-alone facility trialled in North Richmond. It is intended to be integrated with multidisciplinary health and social services, such as GPs, allied health, mental health and sexual healthcare and treatment options for addiction.*
- 2. Council reiterated to the Victorian Government that Melbourne's economic recovery from COVID-19 is critical and that the location and timing of an MSIS will be significant and*
- 3. that the Lord Mayor write to the Health Minister seeking an ongoing and formal commitment from the Victorian Government in relation to amenity, consultation and a framework to resolve issues. That letter was sent from the Lord Mayor to Minister Thomas on Thursday 18 August.*

*Council is committed to supporting the health and wellbeing of everyone who lives, works or visits the City.*
